

Social Security Death Index , Information

The Ancestry.com's Social Security Death Index lists over 72 million names dating from as early as the 1930s. Compiled from the Social Security Administrations Master Death File, this searchable database is a good starting point for those beginning their genealogy.

Tips for using the SSDI

Most of the names listed in the Social Security Death Index date from the 1960s. Though the Social Security Act was created in 1935, a computer system for reporting death benefit claims did not exist until 1962.

Keep in mind that the Social Security Death Index does not list every person who received Social Security Benefits. This index only lists deaths that were actually reported to the Social Security Administration.

Once you've found the name of a relative, you can request a copy of the full Social Security report from the Social Security Administration. Just click on Order original application to send for a copy of your ancestors original Social Security information. You can also use the information in this index to obtain birth, death, and employment records.

How do I get more information for an SSDI entry?

Question

How do I get more information regarding an SSDI (Social Security Death Index) entry?

Answer

The Social Security Administration makes copies of the original Social Security application form (the SS-5) available to third parties who request information on a deceased individual. The application form (SS-5) contains the following information:

- Full name
- Full name at birth (including maiden name)
- Present mailing address
- Age at last birthday
- Date of birth
- Place of birth (city, county, state)
- Father's full name "regardless of whether living or dead"
- Mother's full name, including maiden name, "regardless of whether living or dead"
- Sex and race
- Ever applied for SS number/Railroad Retirement before? Yes/No
- Current employer's name and address
- Date signed
- Applicant's signature

A standard letter to the Social Security Administration is available with the search results on the Ancestry.com Social Security Death Index.

To generate the letter, once you find your ancestor in the SSDI on Ancestry.com, simply click on their name. On the following screen you can generate the letter by clicking on the "Request copy

Social Security Death Index , Information

of original application" link next to your relative's record. This letter may be printed and mailed to the Social Security Administration to request a copy of your ancestor's SS-5 form. The Social Security Administration charges \$27.00 for each individual copy.

Note: Not everyone who has, or has had, a Social Security card will appear on the Social Security Death Index (SSDI). Many enrolled persons are not listed either because their death was not reported to the SSA or they are still living. If you haven't found your deceased ancestor on the SSDI, but he or she was likely enrolled with the Social Security system, it may still be possible to get a photocopy of his or her original SS-5.

To request this information, you will need to send the name and Social Security number of the person you are researching. You might be able to locate the person's Social Security number in the following places:

- personal papers
- death certificate
- funeral home records
- records held by financial institutions
- voter registration rolls at county courthouse
- former employers of the individual

If those sources don't produce the number, you may request a records search with the Social Security Administration. To request this service you must send \$29.00 and provide the following information: full name, state of birth, and date of birth to the following address.

Freedom of Information Officer
4-H-8 Annex Building
6401 Security Boulevard
Baltimore, Maryland 21235

Providing names of parents are also helpful, especially with common surnames. Be sure also to provide proof of death as the records of living individuals are not publicly available.

To generate a letter for information about a particular individual on the SSDI we would suggest taking the following steps:

1. Perform a search in the Social Security Death Index
2. Find an individual on the SSDI that you would like to learn more about and click on their name
3. On the following screen you can generate the letter by clicking on the "Request copy of original application" link next to your relative's record
4. The next page will display instructions for submitting the letter. On the page select the Click Here to Generate Letter link to generate a letter to the SSDI
5. Print the letter. Fill in the appropriate sections and include correct postage and payments. Finally, send the letter.

Please allow 2-3 months for delivery of the letter from the Social Security Administration. For questions about delivery of Social Security letters or expected date of arrival, please contact the Social Security Administration.

What is cost for official copies of SS-5 forms?

Question

What is cost for official copies of Social Security card applications (SS-5 forms)?

Social Security Death Index , Information

Answer

As of July 1, 2001 the Social Security Administration increased their rates for requesting copies of original applications for Social Security cards (SS-5 forms). The rate for an SS-5 form when the individual's social security number is provided is \$27. The rate when the social security number is not provided is \$29.

You can also request an abbreviated Numident form for \$16 as opposed to the SS-5 itself. The abbreviated Numident form typically includes the following information:

Social Security Number
Name on Card
Other Names Used
Date of Inquiry (since Numident records are generated as a result of status changes)
Date of Birth
Place of Birth
Sex
Race/ethnic Code
Mother's Name
Father's Name
Citizenship Code

For more information from the Social Security Administration, please consult the following URL:

Why can't I find my ancestor in the SSDI?

Question

Why can't I find my ancestor in the SSDI (Social Security Death Index)?

Answer

If you are unsuccessful in a search of the Social Security Death Index please see the following for possible reasons why you do not find a particular individual:

1. The individual did not have a Social Security card. Especially before 1951 it is likely that they did not have a Social Security number at all.
2. The individual had a Social Security card, but his/her death was not reported to the SSA. The Death Master File only contains those deaths reported to the SSA. These deaths are usually only reported in conjunction with claims of death benefits.
3. The individual is in the SSDI but listed under another name or another spelling. Try other spellings of the individual's name, including middle names, nicknames, initials, maiden names, other married surnames, etc.
4. The individual is in the SSDI, but the original data was reported or recorded incorrectly.

What further information will the SSA provide?

Question

What further information will the SSA (Social Security Administration) provide?

Answer

The SSDI is available through the NTIS (National Technical Information Service). This information is not controlled by Ancestry.com. If you write concerning information for an individual found or purchase a copy of the record found in the SSDI a response may take several months. The information you will receive will contain the following:

Social Security Death Index , Information

Full name
Full name at birth (including maiden name)
Present mailing address
Age at last birthday
Date of birth
Place of birth (city, county, state)
Father's full name
Mother's full name
Sex and Race
Whether applied previously for SS# or Railroad Retirement
Current employer's name and address
Date signed
Applicant's signature

We receive periodic updates of the Social Security Death Master File from the National Technical Information Service. We usually have the new information added to our online Social Security Death Index within a few business days.

The NTIS does not guarantee the completeness or accuracy of the Death Master File. We post the information exactly as we receive it. If you know of corrections or additions that need to be made to this file, you should contact your local Social Security Office.

You can also send requests in writing to:

SSA
300 North Green Street
Baltimore, MD 21201

What do the abbreviations in the SSDI mean?

Question

What do the abbreviations in the Social Security Death Index (SSDI) mean?

Answer

The following abbreviations or codes which appear in some SSDI records in the Last Residence box, usually in parentheses, are internal codes used by the Social Security Administration and do not mean anything to researchers. Please ignore them.

(72), (PE), (FO), (HC), (VA)

Note: (VA) does not stand for Virginia or Veterans' Administration.

Why is the SSDI data publicly available online?

Question

Why is the information in the Social Security Death Index publicly available online?

Answer

The Social Security Administration (SSA) maintains an official repository of death information via the Death Master File (DMF) which is widely used in the public and private sectors. The DMF is part of the Numident, a master file that contains personal identifying information about each individual to whom the SSA has assigned a Social Security number. The SSA provides the DMF on computer tapes to third party users. The SSA created the DMF as the result of a 1978 lawsuit

Social Security Death Index , Information

requiring the agency to make death information available under the Freedom of Information Act. Congress also enacted legislation requiring that the SSA provide death information to various Federal and State agencies in order to prevent erroneous payments to deceased individuals. The SSA uses the DMF to fulfill these obligations.

For more information please visit the Social Security Administration's official website at the following URL:

<http://www.ssa.gov>

How do I correct errors I have found in the SSDI?

Question

How do I correct errors I have found in the SSDI (Social Security Death Index)?

Answer

The information contained in the Social Security Death Index originates from United States Federal Government Records. Ancestry.com does not have the ability to add to or subtract from the Death Master File, however Ancestry.com is interested in keeping the SSDI current and as accurate as possible.

In order to prevent erroneous or inaccurate information from persisting within the index, the Social Security Administration (SSA) has provided simple instructions in order to correct any mistakes. Please view the following page for information:
